

What's the next step?

School Leavers' Checklist

Ask for advice. Include your teachers, family, and friends in your brainstorming process.

Prioritize. What's the most important to you?

Do your research. Visit colleges, research companies and organizations, consider your budget, etc.

Create a list. Write down your options clearly and concisely and rank them in terms of preference.

Have a back-up plan. It's good to have a Plan B in case your first choice doesn't work out.

Take breaks from thinking about it. Try not to let the decision-making overshadow everything in your life.
